

Kingdom Technology Services Rapidly Grows with Outsourced Accounting

Kingdom Technology Services, over 50 years of expertise – Your Industrial solution provider for Ultraviolet Air, Surface, and Water. Kingdom looks at the application to find the best solution for your operations to include Design, Operation, Service, and Support.

Accounting District was hired to provide outsourced accounting services with a robust, scalable solution for KTS 24/7. We were commended for our ability to act as an extension to the KTS 24/7. team by providing virtual accounting services as the company's revenue rapidly grew.

Service Highlights

- A strategic partner available to answer questions
- Innovative and adaptable to new technology
- Cloud-based accountants to amplify growth

Outsourcing the company's accounting allowed KTS 24/7 to focus on their core business as we designed custom reports tailored to their unique financial needs.

Accounting District provided support and assistance as KTS 24/7's transitioned to 100% cloud-based accounting using Xero and helped them rapidly scale in less than one year to over 100 employees.

"We left because we out grew the support. When you start passing 20 million in revenue, it changes the equation. Over 100 employee systems have to change since our demands are different."

"When you're a small business, you look for ways to be nimble. Accounting is not something we wanted in-house, same with HR and a few others services. We wanted to focus on our core business and product, everything else we decided it was best being outsourced."

- Troy Smith, KTS 24/7
